**Freestyle project**  
This is the central feature of Jenkins. Jenkins will build your project, combining any SCM with any build system, and this can be even used for something other than software build.

**Pipeline**  
Orchestrates long-running activities that can span multiple build agents. Suitable for building pipelines (formerly known as workflows) and/or organizing complex activities that do not easily fit in free-style job type.

**Multi-configuration project**  
Suitable for projects that need a large number of different configurations, such as testing on multiple environments, platform-specific builds, etc.

**Folder**  
Creates a container that stores nested items in it. Useful for grouping things together. Unlike view, which is just a filter, a folder creates a separate namespace, so you can have multiple things of the same name as long as they are in different folders.

**Multibranch Pipeline**  
Creates a set of Pipeline projects according to detected branches in one SCM repository.

A detailed view of a movie booking interface for Pushpa. At the top, there's a large image of the movie poster with the title 'PUSHPA : Pushpa'. Below it, the movie details are listed: '4D Telugu 2H 30M . Crime, Action, Romance'. A 'Buy Tickets' button is visible. The main part of the interface is a five-step process: 1. Select the Cinema Hall (with a dropdown menu for 'Cinema Hall Name'), 2. Select the Show Timing, 3. Select the Date, 4. Select No.of seats, and 5. Review. Step 1 is currently active. To the right of the steps, there's a large 'LOADING IN THEATRES FROM 13 AUGUST 2021' banner. At the bottom left, there's a section titled 'About the Movie' with a brief description. On the far right, the names 'Verneni and Y. Ravi' and 'Malke Mandanna' are listed.
